EXPERIENCE

UI/UX Designer NexTash <i>Oct 2024 - Jul 2025</i> - Design user-centric interfaces for web applications, mobile apps, and ERP systems, enhancing user engagement and satisfaction - Create wireframes, prototypes, and high-fidelity mockups using Figma, Canva, Framer and Sketch - Conduct user research, usability testing, and iterative design improvements based on stakeholder feedback - Collaborate with development teams to ensure pixel-perfect implementation of design specifications - Develop and maintain design systems and component libraries for consistent UI/UX standards across projects - Lead design reviews and present concepts to clients, incorporating feedback to refine solutions - Design responsive layouts optimized for cross-browser and cross-platform compatibility - Manage 5+ concurrent design projects, delivering on-time with 100% client satisfaction
Frontend Developer Nextash <i>Jun 2023 - Sep 2024</i> - Developed responsive and interactive web interfaces using HTML5, CSS3, JavaScript, and modern frameworks (React, Vue.js) - Implemented pixel-perfect UI designs with attention to cross-browser compatibility and performance optimization - Collaborated with backend developers to integrate RESTful APIs and ensure seamless data flow - Built reusable component libraries and maintained code quality through version control (Git) - Enhanced frontend performance, reducing page load times by 25% through code splitting and lazy loading - Participated in Agile sprints, contributing to daily standups and sprint retrospectives - Conducted code reviews and mentored junior developers on frontend best practices - Delivered 10+ client projects on schedule with high quality standards

PROJECTS

Volunteer Managment System Alkhidmat Foundation of Pakistan UI/UX Designer (Figma, Framer, Canvas) <i>Mar 2026 - Apr 2026</i>
--

Designed and prototyped a complete Volunteer Management System focused on improving volunteer coordination and engagement. Created intuitive login and signup flows to ensure a smooth onboarding experience. Designed a responsive and user-friendly website to showcase recent activities, events, and volunteer contributions. Focused on clean UI, easy navigation, and modern design principles to enhance overall user experience and accessibility.

Nextash Product Suite | Restaurant Management & Ordering System

UI/UX Designer (Figma, Framer, Canvas) *Jan 2025 - May 2025*

Designed comprehensive UI/UX for Nextash's integrated restaurant management product suite, creating seamless interfaces for both mobile and desktop platforms. Expanded end-to-end design systems for five interconnected applications: PoX (Point of Sale system), BebbleX (rider delivery management app), TreX (customer self-ordering application), CobreX (business insights and analytics dashboard), and KDX (kitchen display system). Created wireframes, prototypes, and high-fidelity mockups using Figma, Framer, and Canvas, ensuring consistent design language across all products. Designed intuitive POS interfaces for fast transaction processing, rider app with real-time order tracking and navigation, customer-facing ordering app with menu browsing and payment integration, analytics dashboard with data visualization and reporting, and kitchen display screens streamlined for high-volume order management. Conducted user research and usability testing to refine interfaces for different user personas including cashiers, delivery riders, customers, managers, and kitchen staff. Delivered responsive designs ensuring optimal experience across tablets, mobile devices, and desktop screens with consistent branding and user flows throughout the entire product ecosystem.

Creed Cart | E-commerce website & their seller and shipper Dashboards

Frontend Developer *Dec 2023 - Mar 2024*

Developed a complete e-commerce platform with customer-facing website and comprehensive seller admin panel. Built responsive frontend for the main shopping website featuring product listings, search and filtering, shopping cart, checkout process, and user authentication. Designed and implemented seller admin dashboard with inventory management interface, order management system, product upload and editing forms, and sales analytics visualization. Created admin panel with interactive charts and graphs for tracking sales performance, revenue metrics, and customer insights. Enhanced responsive data tables for managing orders, products, and customer information with sorting and pagination functionality. Implemented role-based UI components to differentiate between customer, seller, and admin views. Utilized Bootstrap framework for consistent design across all panels and ensured mobile responsiveness for dashboard access on multiple devices. Built intuitive navigation systems and user-friendly interfaces to streamline seller operations and enhance customer shopping experience.

Smart Solution | Business Website

Frontend Developer *Sep 2023 - Nov 2023*

Developed custom frontend interfaces for an ERP solution using Frappe framework, HTML5, CSS3, and JavaScript. Created responsive user interfaces for key modules including inventory management, sales orders, purchase orders, and customer management. Built custom forms with dynamic field validation, conditional rendering, and user-friendly input controls for data entry. Designed interactive dashboards with real-time data visualization using charts and widgets for business analytics. Implemented custom print formats and report layouts for invoices, quotations, and delivery notes with professional styling. Enhanced user experience through responsive design, ensuring seamless functionality across desktop and mobile devices. Customized Frappe's default UI components to match business branding and improved navigation flow for better usability. Integrated client-side JavaScript for dynamic interactions, form validations, and API calls to backend services.

Qetah | E-Commerce Website

Frontend Developer *May 2023 - Jul 2023*

Developed a fully responsive e-commerce website using HTML5, CSS3, JavaScript, and Bootstrap framework. Implemented complete user authentication with login and signup functionality, dynamic product catalog with search and filtering capabilities, and interactive shopping cart with real-time price calculations. Built a multi-step checkout process with form validation, responsive product detail pages with image carousels, and user dashboard for order history and profile management. Utilized Bootstrap's grid system and components (navbar, cards, modals) to ensure mobile-first responsive design across all devices. Improved performance through minimized files and lazy loading, achieving seamless cross-browser compatibility and enhanced user experience with smooth animations and interactive elements.
